Index to Volume 86

Age, maternal, a model relating the incidence of meiotic trisomy to, 123
Age structured populations, model stability and instability in, 709
Anaerobic infections, a new principle of specificity in; mathematical model of mitosis-stimulated bacterial growth; the application of the tumor–tetanus phenomenon, 783
ANDERSSON, M., Why are there so many threat displays?, 773
Angiosperms, half tetrad analysis in, 315
Aromatic amines, a theoretical study of the carcinogenic nature of, 577

Bacteria, prey and predator, and bacteriophage in continuous culture, a model of, 377
Bacteria, rod-shaped, dimensional rearrangement of, following nutritional shift-up; experiments with *Escherichia coli*, 441
Bacteria, rod-shaped, dimensional rearrangement of, following nutritional shift-up; theory, 421
Bacterial growth, mitosis-stimulated, mathematical model of; a new principle of specificity in anaerobic infections; the application of the tumor–tetanus phenomenon, 783
Bacteriophage in continuous culture, a model of prey bacteria, predator bacteria, and 377
"Balance" argument and the evolution of sex, 593
BALLY, P. (see DERANLEAU, D. A.), 477
BARTHA, F., Effect of error on the quasi-steady-state approximation on the estimation of K_m and V_m from a single time curve, 105
BASS, L., Flow dependence of first-order uptake of substances by heterogeneous perfused organs, 365
BECKER, Y., Is hepatitis B virus DNA in the dane particles a partial virus genome resembling escaping genes?, 255
BEEBEE, T. J. C., Quantitative regulation of transcription in eukaryotes: theoretical considerations of RNA polymerase involvement, 803
BERNHARDT, J. and NEUMANN, E., Analysis of gated flux from or into sealed membrane fragments, 649
BINKERT, TH. (see DERANLEAU, D. A.), 477
Biological relatedness, genetic distance: a simple quantitative measure of, 137
Biological systems, effects of isotope substitution on intermolecular electron transfer in, 203
Biology, evolutionary, and the treatment of signs and symptoms of infectious disease, 169
BRAILSFORD, J. D., KORPMAN, R. A. and BULL, B. S., Crenation and cupping of the red cell: a new theoretical approach. Part I. Crenation, 513
BRAILSFORD, J. D., KORPMAN, R. A. and BULL, B. S., Crenation and cupping of the red cell: a new theoretical approach. Part II. Cupping, 531
BRINES, M. L., Dynamic patterns of skylight polarization as clock and compass, 507

BULL, B. S. (see BRAILSFORD, J. D.), 513, 531
BULMER, M. G. and TAYLOR, P. D., Sex ratio under the haystack model, 83
BULMER, M. G. (see TAYLOR, P. D.), 409

Cancer and evolution: possible relationships to changes in environmental hydrogen ion concentration, 487
Carcinogenic nature of some aromatic amines, a theoretical study of, 577
Catalytic acceleration of reactions by enzymes. Effect of screening of a polar medium by a protein globule, 757
Cellular senescence theoretical considerations of a stochastic model for, 581
Channels, coupled, parallel, forgetting time in (letter), 405
Choline kinase from rat liver; a novel kinetic mechanism explaining the non-hyperbolic behavior of metal activated enzymes, 177
Chromosome 21 trisomy and interferon action (letter), 603
Circadian eclosion rhythm in *Sarcophaga argyrostoma*: a limit cycle representation of the pacemaker, 265
Circadian pacemaker, two coupled neutral oscillators as a model of, 547
Clock and compass, dynamic patterns of skylight polarization as, 507
Compass and clock, dynamic patterns of skylight polarization as, 507
Competition, local mate, and the sex ratio, 409
Competition models, single-level, density compensation, isocline shape and, 323
Cone retina, wiring diagram of; modeling of the vertebrate visual system, 673
Co-operative ligand-binding behaviour predicted by allosteric Koshland models, protein symmetry and, 45
CRAIG, R. J. (see CROWLEY, P. H.), 377
Crenation and cupping of the red cell, a new theoretical approach: crenation, 513
Crenation and cupping of the red cell, a new theoretical approach: cupping, 531
CROWLEY, P. H., SRALEY, S. C., CRAIG, R. J., CULIN, J. D., FU, Y. T., HAYDEN, T. L., ROBINSON, T. A. and STRALEY, J. P., A model of prey bacteria, predator bacteria, and bacteriophage in continuous culture, 377
CROWLEY, P. H. (see HAYDEN, T. L.), 123
CULIN, J. D. (see CROWLEY, P. H.), 377
Cupping and crenation of the red cell, a new theoretical approach: crenation, 513
Cupping and crenation of the red cell, a new theoretical approach: cupping, 531
Current and voltage noise signals recorded from epithelia, attenuation of, 629
CUSHING, J. M., Model stability and instability in age structured populations, 709

Dane particles, is hepatitis B virus DNA a partial virus genome resembling escaping genes?, 255
Death rates, age-dependent, influence on the natural increase of a hypothetical population; evolution of senescence, 149
DEMICHELE, D. W. (see SMITH, K. C.), 493
Density compensation, isocline shape and single-level competition models, 323
DERANLEAU, D. A., BINKERT, TH. and BALLY, P., Estimation of the saturation fraction of bound fluorescent ligands from the intensity and anisotropy of the emission, 477
Disease, infectious, evolutionary biology and the treatment of signs and symptoms of, 169
Dispersal, density-dependent, and spatial distribution of a population, 351

Distance law of the transfer of electronic excitation energy, determination of, 663
DNA base sequence, exact, informational parameters of (letter), 401
DNA, hepatitis B virus, in the dane particles, is it a partial virus genome resembling escaping genes?, 255
Dynamics of discrete-time stochastic models of population growth, 607
Dynamics, unstable, of a periodically driven oscillator in the presence of noise, 455

Eclosion rhythm, circadian, in *Sarcophaga argyrostoma*: a limit cycle representation of the pacemaker, 265
Electron transfer, intermolecular, in biological systems, effects of isotope substitution on, 203
Electronic energy, the problem of rapid irreversible redistribution of; primary photosynthetic processes, 223
Electronic excitation energy, determination of the distance law of the transfer of, 663
Electronic parallel conductance model and the mutual entrainment of two pacemaker cells, 731
Energy flow in a simple nervous system, information and, 3
Enzymes, catalytic acceleration of reactions by; effect of screening of a polar medium by a protein globule, 757
Enzymes, metal activated, a novel kinetic mechanism explaining the non-hyperbolic behavior of; case of choline kinase from rate liver, 177
Epithelia, attenuation of current and voltage noise signals recorded from, 629
Escherichia coli experiments on dimensional rearrangement of rod-shaped bacteria following nutritional shift-up, 441
Eucaryotes, mathematical modelling of translation of mRNA in; steady states, time-dependent processes and application to reticulocytes, 279
Eukaryotes, quantitative regulation of transcription in; theoretical considerations of RNA polymerase involvement, 803
Evolution and cancer: possible relationships to changes in environmental hydrogen ion concentration, 487
Evolution of senescence: influence of age-dependent death rates on the natural increase of a hypothetical population, 149
Evolution of sex and the "balance" argument, 593
Evolutionary biology and the treatment of signs and symptoms of infectious disease, 169
EWALD, P. W., Evolutionary biology and the treatment of signs and symptoms of infectious disease, 169

FABRICIUS, E.-M. (see SCHMIDT, W.), 783
Flow dependence of first-order uptake of substances by heterogeneous perfused organs, 365
Fluorescent ligands, bound, estimation of the saturation fraction from the intensity and anisotropy of the emission, 477
Flux, gated, from or into sealed membrane fragments, analysis of, 649
Forgetting time in coupled, parallel channels (letter), 405
FU, Y. T. (see CROWLEY, P. H.), 377

G_1, is it normally distributed?, 117
Gated flux from or into sealed membrane fragments, analysis of, 649

Genes, escaping, is hepatitis B virus DNA in the dane particles a partial virus genome resembling?, 255
Genetic distance: a simple quantitative measure of biological relatedness, 137
GILLIS, M. (see HARGUINDEY, S.), 487

SUZUKI, R. (see KAWATO, M.), 547
Symptoms and signs of infectious disease, evolutionary biology and the treatment o 169
SZALAY, L. (see MARÓTI, P.), 663
TAYLOR, P. D. and BULMER, M. G., Local mate competition and the sex ratio, 40

TAYLOR, P. D. (see BULMER, M. G.), 83
Tetrad analysis, half, in angiosperms, 315
Threat displays, why are there so many?, 773
THURAISINGHAM, R. A. and NILAR, S. H. M., A theoretical study of th carcinogenic nature of some aromatic amines, 577

Time, forgetting, in coupled, parallel channels (letter), 405
Time-dependent mathematical expression of the Münch hypothesis of phloem transport, 493
Transcription in eukaryotes, quantitative regulation of; theoretical considerations of RNA polymerase involvement, 803
Translation of mRNA in eucaryotes, mathematical modelling of; steady states, time-dependent processes and application to reticulocytes, 279
TRIFFET, T. and GREEN, H. S., Information and energy flow in a simple nervous system, 3
Trisomy, chromosome 21, and interferon action (letter), 603
Trisomy, meiotic, a model relating its incidence to maternal age, 123
Tumor–tetanus phenomenon, the application of; a new principle of specificity in anaerobic infections; mathematical model of mitosis-stimulated bacterial growth, 783

Uptake, first-order, of substances by heterogeneous perfused organs, flow dependence of, 365

V_m and K_M effect of error on the quasi-steady-state approximation on their estimation from a single time curve, 105
VAN DRIESSCHE, W. and GÖGELEIN, H., Attenutaion of current and voltage noise signals recorded from epithelia, 629
VANMEERWIJK, W. P. M. (see YPEY, D. L.), 731
Vertebrate visual system, modeling of; wiring diagram of the cone retina, 673
Visual system, vertebrate, modeling of; wiring diagram of the cone retina, 673
Voltage and current noise signals recorded from epithelia, attenuation of, 629
VOROTYNTSEV, M. A. and ITSKOVICH, E. M., Primary photosynthetic processes: the problem of rapid irreversible redistribution of electronic energy, 223

WHITEHEAD, E. P. Protein symmetry and the co-operative ligand-binding behaviour predicted by allosteric Koshland models, 45
WILSON, E. (see HAYDEN, T. L.), 123
Wiring diagram of the cone retina; modeling of the vertebrate visual system, 673
WOLDRINGH, C. L., GROVER, N. B., ROSENBERGER, R. F. and ZARITSKY, A., Dimensional rearrangement of rod-shaped bacteria following nutritional shift-up; experiments with *Escherichia coli*, 441
WOLDRINGH, C. L. (see GROVER, N. B.), 421

YPEY, D. L., VANMEERWIJK, W. P. M., INCE, C. and GROOS, G., Mutual entrainment of two pacemaker cells. A study with an electronic parallel conductance model, 731

ZANI, L. (see GRANERO-PORATI, M. I.), 401
ZARITSKY, A. (see GROVER, N. B.), 421
ZARITSKY, A. (see WOLDRINGH, C. L.), 441
